

Our scheme will deliver long term benefits for:

Economy – support economic growth, facilitating growth in jobs and housing by providing a free-flowing and reliable connection between the South East and the South West.

Community – work with local communities to reduce the impact of the road on a sense of community severance, and look for ways to improve local people's quality of life.

Safety – make the road safer by providing additional capacity and reducing driver stress. The scheme will also make routes safer for pedestrians, cyclists and horse riders in the area.

Transport – make journey times more reliable and resilient. When the scheme provides more capacity it will be easier to manage traffic when incidents occur, and reduce delays when there are queues at peak times.

Environment – protect the environment and look for opportunities to improve it, minimising any unnecessary impact of the scheme on the surrounding natural and historic environment and landscape.
